

Merak: Wo finde ich nähere Hinweise zur Verwaltung der Mails insbesondere SPAM und Alias unter dem Merak Verwaltungsserver. Insbesondere die Syntax der Spam-Phrasen-Regelung interessiert mich brennend !

Gruß

Bernd

Informationen zum Merak Mailserver und dessen Spamsystem lassen sich unter <http://www.merakmailserver.de>
<http://www.merakmailserver.com>
und <http://www.icewarp.com>
entnehmen.

Phrasen in Merak und deren Verwendung [Auszug direkt von Merak]:

"

0: - Reject

1: - Accept

2: - Delete

This will make a filter exception but will not affect other filters.

You can also specify the whole area to be accepted or rejected by a single line

containing 1 or 0. That means all following filters are meant to be rejected (0)

or accepted (1) unless the filter record itself has the reject/accept prefix.

Syntax of the filter:

Items:

H - Header

B - Body

A - Attachmenmt

S - Sender

R - Recipien

Merak: Wo finde ich nähere Hinweise zur Verwaltung der Mails insbesondere SPAM und Alias unter dem Merak Verwaltungsserver. Insbesondere die Syntax der Spam-Phrasen-Regelung interessiert mich brennend !

Gruß

Bernd

I - IP Address

Y - Any Header

P - rDNS (PTR)

Functions:

~ - Contains

^ - RegEx

{ - Starts With

} - Ends With

= - Is

! - NOT (Negates the function)

\$ - Case Sensitive

Filter Examples:

A~.com;.exe;.bat;.cmd;.scr // Attachment contains any of the file types

H~Subject: win;free;!!! // Header contains any of the strings

I=205.128.218.193 // IP Address

Y\$^Subject: WIN Free!!!\$ // Any header case sensitive RegEx expression

H!~Subject: money // Header does not contain the string

205.*.*.193 // IP Address matches the mask

domain.com // Sender domain name match

Bernd

bill*@domain.com // Sender email address matches the mask

More Sophisticated Filter Examples:

1:H~Subject: please help // Accept if subject contains "please help"

A~.com;.exe;.bat;.cmd;.scr // Reject attachments containing

1 // Accept the following filters

IP=192.168.0. // 1 Accept messages from IP 192.168.0.1

0 // Reject following filters

A~.vbs;.bat // Reject attachments containing any of the file types
